🪪 WORK EXPERIENCE

- Working with Vyom Labs Pvt. Ltd. as Java Developer from sept 2021 to till date.
- Total experience : 2 Years 2 months
- Company Address: Sunrise Business Park, near Cummins Campus, Balewadi, Pune, Maharashtra, 411-045

🎓 EDUCATION

Completed Bachelor of Engineering from Savitribai Phule Pune University (SPPU) in 2019.

🧠 TECHNICAL SKILLS

- Programming Languages : Java
- Core Java : HashMap, Collection Framework, Multi-threading
- Databases : MySQL
- Web Technologies: Servlet, JSP, HTML, CSS
- Frameworks : Spring Boot, Hibernate, Spring MVC
- Version Control Tool: Git
- Project Management Tool: JIRA,
- IDS's: Eclipse, STS-4
- Servers: Apache Tomcat
- Operating Systems : Windows
- Other Tools : Postman

⚛ OBJECTIVE

Desirous for the role of Java Developer to design complex requirements of clients and customers into hi-tech and reliable software. Excellent knowledge of software design and development and 2+ years of work experience as a Java developer.

🪪 PROFILE SUMMARY

- Adequate knowledge to work with **Agile Methodology.**
- Proved experience on **Java 1.8 features.**
- Strong Proficiency on **apache tomcat.**
- Have **2+ years** of Hands-on **Experience** in software development using **Java technology.**
- Working as a **Java backend developer.**
- Revamp various Java applications in **Core Java, OOP's Concepts, String class, Arrays along with Collections Framework.**
- Competence exposure about **Exception Handling.**
- comprehensive knowledge with - **JDBC, JSP** & **Servlet.**
- Apperceive knowledge in database using **MySQL** .
- pervasive knowledge of **Spring IOC, Spring MVC.**
- Hands on Experience in Web application using **Spring boot** only.
- Proactive in Producing and consuming the **REST API.**
- utilized software engineering expertise in **Hibernate mapping.**
- Provide a expert support in coding standards as per industry **design patterns** like **Singleton, Factory.**
- Worked in **E-commerce domain.**
- Exposure in design the **custom exception.**
- Strong grasp with creation of Web services using REST.
- Enhanced the application features in API Testing Tool using **Postman.**
- Good trained in Creating detailed documents related to projects.
- Exceptional knowledge about version control tool **Git.**
- Proved experience in project management tool like a **JIRA.**
- Dealing with **pom.xml file** to add **maven dependency.**

📁 PROJECT

Project Name: Briofab

Domain : E-commerce

Description :

It is online process which is planned for online retailers. The main objective of this application is easy to search and buy the product. There are several options such as searching, viewing and selection of a product easier. The search engine provides an easy and convenient way to search for products where a user can search for a product interactively and the search engine would refine the products available based on the user's input. The user can then view the complete specification of each product, user is also writing their own reviews.

Roles and Responsibilities :

- Planning and designing J2EE applications as per business requirements
- Preparing and maintaining entire documents for projects
- Responsible for developing modules.
- Identified designing and involved in development.
- Active participation in weekly/daily status calls with the client.
- Developing Server-side scripting
- Transforming requirements into stipulations
- Support continuous improvement
- Investigating alternatives and technologies
- Presenting for architectural review
- Communicate and follow through with technical leads on application stories

DECLARATION

I do hereby declare that all the information given above is true to the best of my knowledge and belief.
